Serial No. 376,378
Art Unit 216

The present status of each application listed in the first paragraph of page 2 must be given.

Page 4, line 27, the spelling of "sectional" is indistinct in the specification.

Page 6, line 4, the spelling of "texts" is indistinct in the text.

Page 9, line 18, the fourth item in the line is indistinct. Page 15, last line, "housing" is indistinct.

Applicant should review the specification and make any changes of which he may become aware.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The specification is objected to under 35 U.S.C.

112, first paragraph, as indefinite because the operation of manipulator 47' is not clear. How are units of work removed or placed on table 41 by manipulator 47'

10cated in or exteriorily of chambers 12? The description on page 6 fails to set forth an adequate written description of the device. On page 23, the location of the laser is confusing. Is chamber 11 the same as controller 11? Figure 1 is mute in this respect.

Claims 1-19 are rejected under 35 U.S.C. 112, first paragraph, for the reasons set forth in the above objection to the specification.

Claims 1-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 17 is confusing. Is the radiation generated by the third means? Claim 11, lines 11, 15 and 16, the terms "automatically controlling" and "automatic manipulator" are not clear. They do not specify how or by what means controlling is performed; or, how or by what means manipulation is performed.

The above comments are applicable to claim 16, lines 17 and 18.

Robinson, Cohen, et al, Gorman and Dard, et al are cited to show machining apparatus similar to that claimed.

Any inquiry concerning this communication should be directed to C. L. Albritton at telephone number 703-557-4942.
